

# VOLANTÉ™ MONITOR LIFT

With Volanté, adding Sit-Stand capability to an existing workstation couldn't be easier. The tool-free installation takes minutes and only requires an existing desk or tabletop at least 24" deep.

A cantilevered design allows Volanté to securely hold 35lbs of equipment 20" above the tabletop, but a pneumatic mechanism with infinite adjustability allows you to position the monitor lift anywhere over its 13.8" height range. Height adjustments with the paddle controls will be familiar to anyone with a task chair.

In addition to the spacious 35.4" x 15.7" main platform, Volanté includes a 26.4" x 7.5" keyboard and mouse platform. This keyboard platform can

be tilted over a 20° range to achieve the perfect typing angle whether the user is in a standing or seated position.

Sleek and intuitive doesn't mean underpowered when it comes to Volanté. The capacity and size of the main platform are sufficient to accommodate 2-24" monitors side by side, and a grommet at the rear of it allows you to use a monitor mount to support them. If your monitor is on a stand, the grommet can be covered completely or partially to allow cables to pass through.

Regardless of the equipment you choose to use with it, Volanté will make joining the Sit-Stand revolution a breeze.

Single and dual monitor mounts can be mounted to the main platform through the grommet at the rear of it.

Press the paddles beneath the main platform to adjust the platform height, and release to lock the workstation in the new position.

A 13.8" height range allows you to set the height of the monitor platform exactly where you need it, from 6.2" - 20" above the tabletop.

The keyboard tray tilt can be set at any angle over a 20° range, ensuring every user will be able to find an ergonomic typing position.
